# WASTE DAY CHANGE JUNE 2009

## Why are we changing to same day collections?

At present households have their waste collected on up to three different days so changing to the same day will make it easier and simpler for everyone and help to increase recycling rates across the area.

## How to find out your new collection day

The Council will inform everyone of their new collection day. We will start posting details out to every household 2 weeks before the new collections, so you should receive the information by the beginning of June. During May you will also be able to look up your new collection day by visiting our website [www.bathnes.gov.uk/wastedaychange](http://www.bathnes.gov.uk/wastedaychange) or by contacting Council Connect.

## How you should present your waste for collection

Please follow these instructions. It is important to separate the different types of waste so that each collection crew can easily pick-up the right materials.

### RUBBISH WEEKLY

Conventional dustbin or black sacks

### RECYCLING WEEKLY

Green recycling box or carrier bags (bags should be left untied)

#### NO black sacks.

It is important to make sure that all your recycling can be clearly identified by the collection crews so that it is not mistaken for rubbish.

### CARDBOARD AND GARDEN WASTE FORTNIGHTLY

**Cardboard** packed flat and tied with string or packed into a cardboard box for easy handling by the collection staff. **(NO drinks cartons).**

**Please do not put cardboard in plastic bags or your green recycling box.** The cardboard and brown paper is composted with the garden waste.

**Garden Waste and cardboard** in Council prepaid sacks or wheeled bins

Please make sure that you put your waste out by 7am on your collection day at the front edge of your property so that it is visible and accessible without causing an obstruction.
